Every element of workflow management in a single tool

Pipefy's no-code platform centralizes, automates, and optimizes all your workflows to improve operational efficiency in every department.

Workflow management made easy

Pipefy helps teams centralize and organize their workflows for deeper visibility and control to save time and avoid repetitive manual work.

Integrate all your apps, systems, and tools to dissolve data silos and improve collaboration with other teams and external stakeholders. No more searching through endless emails or wasting time trying to manage spreadsheet sprawl.

Easily standardize any workflow to ensure consistency and simplify compliance with built-in security features like permission management, SSO, 2FA, audit logs, and an uptime of 99.9% or higher to keep your processes running smoothly and free of interruptions.

Pipefy is designed to be used by everyone on your team, no coding experience required. That means a complete workflow management toolbox that doesn't add to the IT backlog.

What's possible with Pipefy

75% faster SLA lead times (from 4 days to 1)

DCDD

50% reduction in request lead times (from 45 days to 20)

46% of manual emails managed through automation

BERNECK

2,400 work hours saved in one year

Incoming email queries from 20 inboxes consolidated into a single workflow and automatically assigned an SLA based on query type

Capgemini

The 3 pillars of workflow optimization

Centralization

Consolidate and control all your workflows in a single screen.

Integrate with your existing ERP, document signing apps, databases, and collaboration tools for seamless workflow management.

Guest portals and customizable forms make it easy to capture and consolidate information, even from external stakeholders.

Visibility

Identify and solve bottlenecks, broken handoffs, and collaboration silos with X-ray insights.

Easily organize and monitor incoming requests with rules and conditionals.

Permission management and audit logs ensure traceability and accountability.

Multiple views keep deadlines, statuses, and SLAs on your radar.

Automation

Eliminate manual tasks and get more time for what matters most.

Automate emails, status updates, approval flows, notifications, and other repetitive tasks.

Standardize and structure all your workflows to prevent duplicate efforts and avoid unnecessary errors.

Pipefy optimizes workflows for every team

"Pipefy was a key partner in establishing a clean workflow process for our beverages customer, even participating in the impact assessment sessions helping to identify improvement opportunities from day one."

Mario Alvarado, Operations Manager at Capgemini

The most efficient teams in the world trust Pipefy
